

HARSHITH HARIJEEVAN

+1(714) 272-1657 | Austin, Texas | harshith.harjeevan@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building modern, cloud-native SaaS applications for Fintech startups. Delivered user-centric front-end product features with a founder mindset and frequent releases. Implemented CI/CD pipelines for event-driven architectures, modernizing legacy systems, building test automation scripts and secure endpoints. Expanded into AI-enabled solutions using LangChain, LLMs, web scraping, vectors and prompt engineering.

TECHNICAL SKILLS

Programming Languages: Go, TypeScript, Python, JavaScript (ES6+), Java, HTML5, CSS3

Web Frameworks/Libraries: ReactJS, Next.js, Node.js, Flask, Spring Boot, Redux, Tailwind CSS

Cloud & DevOps: EC2, S3, Lambda, RDS, Docker, Kubernetes, GitLab/GitHub Actions

Databases & Testing: MongoDB, PostgreSQL, Supabase, MySQL, Redis, Jest, Selenium, Terraform

Tools & Technologies: GraphQL, WebSockets, Kafka, CMS, Figma, Copilot, LangChain, Zapier

WORK EXPERIENCE

Software Development Engineer | InterspectAI | Austin, Texas | July 2025 - Present

- Leveraged GitHub Copilot to accelerate development of an **Agentic AI PaaS** with a **CockroachDB** backend system
- Built scalable REST and GraphQL APIs via Flask, and configuring **UIBakery** to improve administrative efficiency
- Participated in daily standup and engineering practices such as Test-Driven Development principles for robust code

Full Stack Developer | BizInc | Atlanta, Georgia | Sep 2024 - July 2025

- Addressed slow onboarding by developing an **AWS**-based employer portal that doubled hiring in 3 months
- Optimized UI via caching & indexing of NoSQL **MongoDB** queries and RESTful services, reducing latency by 40%
- Conducted A/B testing on UI/UX iterations over Kanban sprints, boosting user engagement by 25% using analytics
- Rebuilt **Figma** workflows using high-fidelity wireframes to reduce handoff delays, shortening design cycles by half

Software Engineer | MindKind | Long Beach, California | June 2024 - Aug 2024

- Redesigned B2C website in NextJS, Supabase & Tailwind CSS for SEO, boosting low user engagement by 30%.
- Refactored scalable **NodeJS** services in **TypeScript**, boosting end-to-end performance by 35% under peak load
- Automated infrastructure with Terraform and JWT/OAuth 2.0, enhancing security and cutting deploy errors by 40%

Software Engineer | Danske IT (Infosys) | Bengaluru, Karnataka, India | Aug 2019 - Jul 2022

- Modernized legacy **COBOL** interfaces using **React**, Backend-for-Frontend layer in **.NET**, and REST APIs in **Java**
- Doubled responsiveness using **Redux** tools and **Context** API, SSR, lazy loading and collaborative code reviews
- **Automated** triage and report tasks with Python, Selenium, and VBA scripts to resolve manual effort inconsistencies
- **Collaborated** with cross-functional teams in Agile sprints to evaluate requirements and create migration strategy
- Business advisors achieved flexibility for policy code updates, while log data was stored in **SQL DB2** database

PROJECTS

AI-Driven Reinforcement Learning Assistant Using Notes | [GitHub](#)

- AI-powered app that converts user notes into quizzes using LangChain, HuggingFace models and custom prompts
- Automated spaced repetition and quiz generation workflows using LLMs, RAG, vector search, and retrieval logic

Cloud-based Media Consumption App Using Microservices | [GitHub](#)

- Built a secure, image-sharing platform via React, Spring Boot, Docker on AWS, using Blockchain for authentication
- Implemented real-time content moderation using TensorFlow.js & MobileNet, reducing manual review effort by 90%

Duolingo Stats Automation Pipeline | [GitHub](#)

- Lacking an official API, built a data pipeline using **Selenium** and **BeautifulSoup** to scrape and display statistics.
- Optimized the system with **PostgreSQL**, **Redis** caching and **GitHub Actions** for CI/CD, for an efficient workflow.

EDUCATION

California State University Fullerton, Masters in Computer Science

Aug 2022 - May 2024

Relevant Courses: Web Backend, Mobile Dev, Cloud Computing, Advanced Algorithms, Advanced Blockchain
