

HARSHITH HARIJEEVAN

Austin, Texas | +1(512) 766-4910 | harshith.alva1853@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable, cloud-native web applications and secure APIs across startups and enterprises using **React**, **Next.js**, **TypeScript**, **Python**, **SQL**, and **AWS**. Proven track record delivering performant, user-centric front-end features, implementing CI/CD pipelines for microservices, modernizing legacy systems, and developing automation scripts. Recently expanded into AI-enabled development, applying tools like **LangChain**, **LLMs**, **vector** databases, and **prompt** engineering to build intelligent features within full-stack products.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, HTML5, CSS3
Frameworks/Libraries	React.js, Next.js, Node.js, Flask, Spring Boot, Redux, Tailwind CSS
Cloud & DevOps	AWS (EC2, S3, Lambda, RDS), Azure DevOps, Docker, Kubernetes, GitLab/GitHub Actions
Testing & Databases	Jest, Selenium, Terraform, MongoDB, PostgreSQL, MySQL, Firebase
Other Tools	GraphQL, WebSockets, Kafka, Figma, Mapbox, LangChain, Zapier

WORK EXPERIENCE

Full Stack Developer | BizInc | Atlanta, GA (Sep 2024 - Present)

- Faced with slow onboarding, built an **AWS-based** employer portal (**EC2**, **Lambda**), doubled hiring rate in 3 months.
- Optimized slow UI with caching and indexing of **MongoDB** queries and **REST** APIs, reducing latency by 40%.
- Ran A/B tests on poor iterations of **UI/UX** and **React** flows across Kanban sprints, boosting user engagement by 25%.
- Resolved cross-device issues and improved usability with **WCAG** guidelines, improving accessibility compliance.
- Rebuilt **Figma** workflows using high-fidelity wireframes to reduce handoff delays, shortening design cycles by 60%.

Full Stack Engineer | LME Services | Hoffman Estates, Illinois (Jun 2024 - Sep 2024)

- Faced low user retention, rebuilt B2C frontend in **Next.js** and **Tailwind CSS**, increasing engagement by 30%.
- Refactored scalable **Node.js** APIs written in **TypeScript**, boosting performance by 35% under peak load.
- Reworked state logic using **Redux/Context** APIs, **SSR**, lazy loading and prefetching to double responsiveness.
- Automated infrastructure with **Terraform** and auth via **JWT**, **OAuth 2.0**, cutting deploy errors and downtime by 40%.

Full Stack Developer Intern | Uber | USA (Dec 2023 - May 2024)

- Optimized **Kafka** and **Node.js**-based ride-matching algorithms, reducing real-time allocation time by 20%.
- Integrated **Google Maps API** and **Mapbox** for dynamic routing, improving ETA accuracy by 18%.
- Delayed notifications prompted **WebSocket** and **Firebase** revamp to deliver faster ride status updates.
- High API response times addressed by migrating to **GraphQL APIs**, cutting response payload size by 25%.

Software Engineer | Danske IT (Infosys) | Bangalore, KA, India (Aug 2019 - Jul 2022)

- Modernized legacy **COBOL** banking systems by migrating to **React** and **Spring Boot**, achieving 70% cost savings.
- Automated 60% of batch processing/reporting tasks using **Python**, **Selenium** and **VBA** scripts, cutting manual effort.
- Built CI/CD pipelines via **GitLab** and **Azure DevOps**, cutting deployment time by 40% and downtime by 30%.
- Analyzed **ServiceNow** logs and tuned **DB2** queries, reducing incidents by 70% and improving developer debugging.
- Led Agile sprint planning in **Jira** with cross-functional teams having DevOps, QA, Danish Stakeholders and Analysts.

PROJECTS

AI-DRIVEN REINFORCEMENT LEARNING ASSISTANT USING NOTES

- AI-powered app that converts user notes into quizzes using **LangChain**, **HuggingFace** models and custom prompts.
- Automated spaced repetition and quiz generation workflows using **LLMs**, vector search, and retrieval logic.

CLOUD-BASED MEDIA CONSUMPTION APP USING MICROSERVICES

- Built a secure, image-sharing platform via **React**, **SpringBoot**, **Docker** on **AWS**, using **Blockchain** for authentication.
- Implemented real-time content moderation using **TensorFlow.js** and **MobileNet**, reducing manual review effort by 90%.

EDUCATION

Masters in Computer Science

California State University Fullerton

Aug 2022 - May 2024

Fullerton, CA

Relevant Courses: Web Backend, Mobile Dev, Cloud Computing, Advanced Algorithms, Advanced Blockchain
